

# Loop control structure

Week 10 Session 1

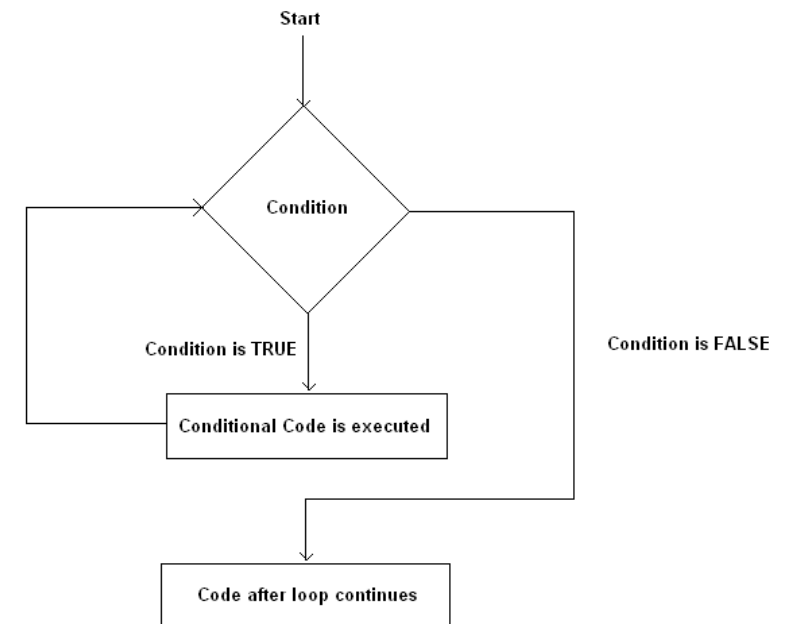

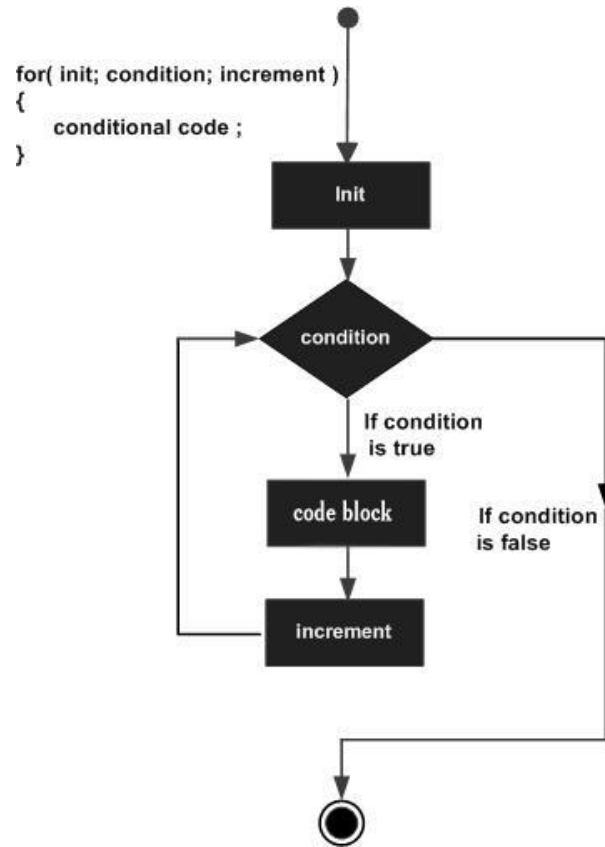

# Flow chart symbol

Symbol	Name	Function
	Process	Indicates any type of internal operation inside the Processor or Memory
	input/output	Used for any Input / Output (I/O) operation. Indicates that the computer is to obtain data or output results
	Decision	Used to ask a question that can be answered in a binary format (Yes/No, True/False)
	Connector	Allows the flowchart to be drawn without intersecting lines or without a reverse flow.
	Predefined Process	Used to invoke a subroutine or an Interrupt program.
	Terminal	Indicates the starting or ending of the program, process, or interrupt program
	Flow Lines	Shows direction of flow.

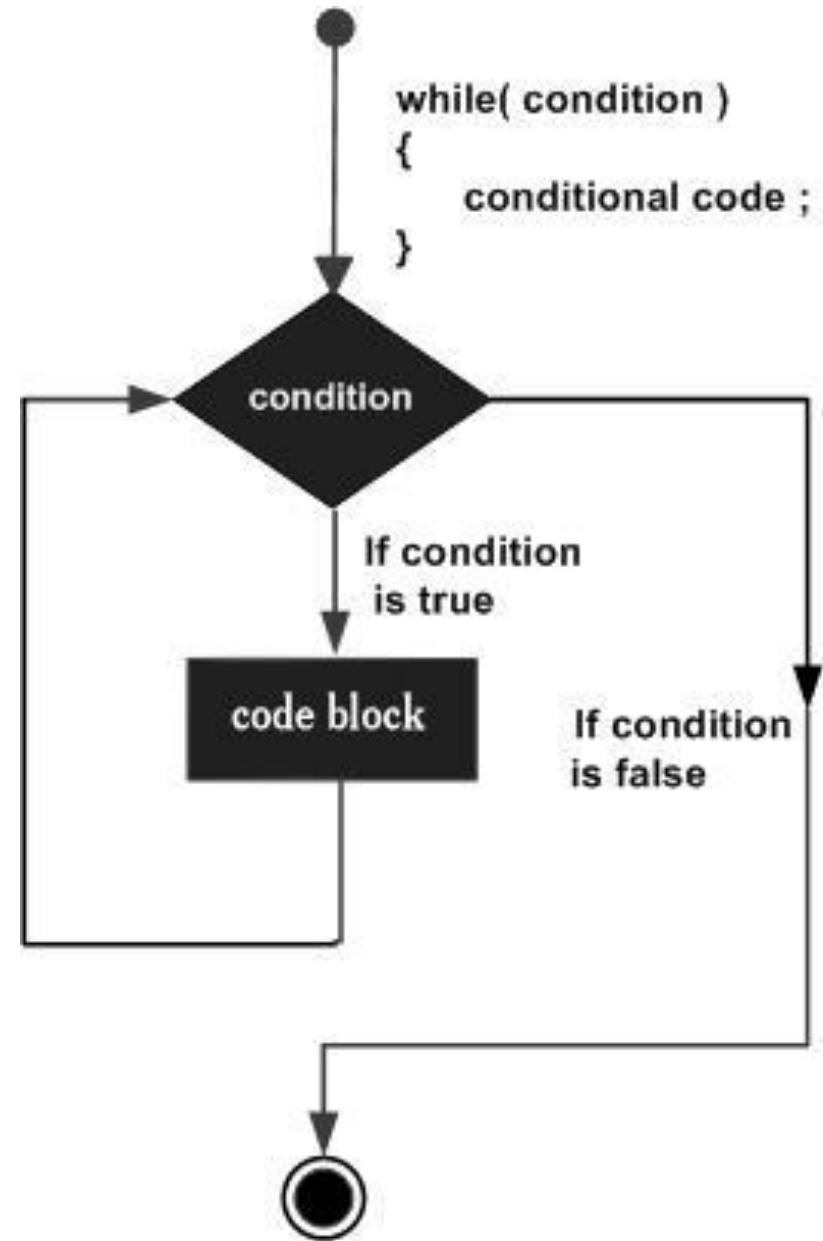

# If-then-else

# FOR Loops

# WHILE Loops

## D-WHILE Loops

**Relationships among common distributions.** Solid lines represent transformations and special cases, dashed lines represent limits. Adapted from Læemis (1986).

# Bernoulli-Binomial-Poisson-Geometry

- Domain
  - $(0,1) \rightarrow \text{Bernoulli}(p) \leftarrow \text{ONE Object}$
  - $(0,1,2,\dots,N) \rightarrow \text{Binomial}(N,p) \leftarrow \text{more than one object}$
  - $(0,1,2,\dots) \rightarrow \text{Poisson}(\lambda) \leftarrow \text{more than one object}$
  - $(1,2,3,\dots,N) \rightarrow \text{Geometry}(p) \leftarrow \text{ONE Object}$

# Bernoulli-Binomial-Poisson-Geometry

- Process 1
  - Binomial  $\leftarrow$  Cumulative of  $N$  Bernoulli
  - Poisson( $\lambda$ )  $\leftarrow$  Cumulative of  $N \sim \infty$  Bernoulli
  - Geometry( $p$ )  $\leftarrow$  ONE Object is repeated for  $N$  times Bernoulli

# Bernoulli-Binomial-Poisson-Geometry

- Process 2
  - Bernoulli( $p$ )  $\rightarrow$  IF – THEN Statement
  - Binomial  $\leftarrow$  IF – THEN Statement inside FOR LOOP
  - Poisson( $\lambda$ )  $\leftarrow$  IF – THEN Statement inside WHILE LOOP
  - Geometry( $p$ )  $\leftarrow$  IF – THEN Statement inside FOR LOOP for a repeated one object experiment
  - Geometry( $p$ )  $\leftarrow$  DO-WHILE Statement
